

## SYPH - Single Rail Chock

The SYPH wheel chock is a hi-vis HGS wheel chock with a easy-reach handle. This aluminum alloy chock embodies a majority of the HWG's performance characteristics with added benefits and features. The HGS wheel chock has a shorter length from heel to toe that allows for a steeper line of force between axle and rear teeth and therefore an enhanced coefficient of friction. It's ease-of-use design allows for fast storage and placement.

- **MATERIAL:** Heat Treated
- **SIZE:** 7.75"H x 8.5"W x 12"L
- **WEIGHT:** 4.9 lbs.

### Material Safety Data

<b>Tire Size</b>	LARGE TIRES: Home delivery vehicles, utility vehicles, ambulances, ladder trucks (4).
<b>% Grade Rating</b>	Effective single limit 16% (32% grade paired)
<b>Test to Failure</b>	Exceeds SAE standards (paired)
