

DOK - Dock Chock

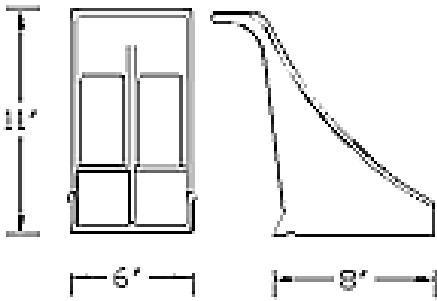

MODEL 1210705700

Wheel Chock

DOK stay in place. Heel-to-toe length allows for a steeper line of force between axle and rear teeth, and therefore an enhanced coefficient of friction.

DOK are strong. Compact structural design allows a test-to-failure well above maximum tire forces.

- Cast Aluminum
- 9.25"H x 6.25"W x 10.25"L
- 6.7 lbs.
