

HGSO - Heavy Gripper Orange

MODEL 121009

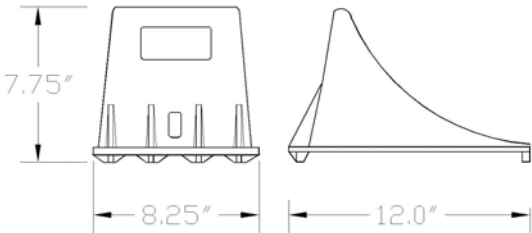

Wheel Chock

HGS stay in place. Heel-to-toe length allows for a steeper line of force between axle and rear teeth, and therefore an enhanced coefficient of friction.

HGS are easy to use. Hand-grab opening allows for fast placement and retrieval. Flanged base allows a full range of bracket options.

HGS are strong. Compact structural design allows a test-to-failure well above maximum tire forces.

- Aluminum / ORANGE paint
- 7.75"H x 8.5"W x 12"L
- 4.9 lbs.

Features tough **ORANGE** powder coating.

MATERIAL SAFETY DATA SHEET

LARGE TIRE SIZE	Propane, utility, and fire trucks. Loading docks. Trailers.
PERFORMANCE	Effective single limit 16% (32% grade paired) [STATIC]
STANDARDS MET	SAE J348, NFPA 1901 (2003), DOT Park Brake (use in pairs)
